Do recent news stories of workplace tragedies make you wonder if your company has its "safety-related matters" in order? Let the **Certified Occupational Safety Specialist® (COSS)** program help you figure it out! Take the next step and register for this nationally-known program.

See the upcoming Midland, Michigan class schedule below or visit www.coss.net for more information.

The COSS Program is Unique

Not only will you learn how to read and understand the OSHA 1910 and 1926 Code Federal Regulations and help your company avoid OSHA citations that cost millions of dollars, but more importantly, by learning how to work safely on a job site, you can teach your company how to eliminate the risk of fatalities and near misses. Almost 47% of COSS graduates responding to our survey, indicate that since taking COSS, their company's injury rate and/or OSHA recordables have decreased by as much as 25% and others attest to as much as a **100% decrease!**

Request a Course Outline & Syllabus for more information.

The class also addresses the psychology of safety, the true cost of an accident, hazard recognition, how to start a health & safety program, behavior based safety, and much more!

What Will You Receive?

Upon successfully completing the program, you will obtain your national Certified Occupational Safety Specialist (COSS) designation, your OSHA 10-hour card of completion in Construction, and your OSHA 10-hour card of completion in General Industry.

Great Lakes Safety Training Center
Midland, MI

May 14-18, 2012 (8am-5pm)
September 17-21, 2012 (8am-5pm)

Member Pricing: $1,699
Non-Member Pricing: $2,199

National Program Recognitions

COSS is one of only 37 programs in the world accredited by the **American Petroleum Institute (API).** In addition, the certifying body for construction education for colleges, universities and technical/trade schools, **American Council for Construction Education (ACCE),** has also recognized our program. COSS is the only non-degree program to receive this national endorsement. Lastly, COSS has been established as a mandatory course for students in the Construction Management Program at Louisiana State University.

Program Content

The program consists of 40 hours of hands on, face-to-face learning, which is delivered by an Authorized OSHA Outreach Trainer in both Construction and General Industry. Case studies and workshops are used extensively to bring learning objectives into focus. Guest speakers from areas such as OSHA and other governmental agencies are used to enhance the learning experience. Student presentations, daily quizzes, practical reviews and a comprehensive final exam will allow you to demonstrate your competency.

Prerequisites

The only prerequisite for the COSS program is you must have a high school diploma or equivalent. In each class, we tend to have a mix of non-experienced, first time safety persons, as well as safety professionals who have been in the safety field for 20+ years. But, we have learned that regardless of the number of years of experience you have in safety, everyone leaves the COSS class with a wealth of knowledge!

If you would like more information on the COSS program, call 989.839.7043 or email kjuday@great-lakes-safety.com
